Job description
Front-end developer (UK-remote)

The Role:

You will be responsible for building and refining all user interfaces and working with our other front-end developers, back-end developers and the UX Designer to create accessible, cross-browser/device interfaces for our B2C and B2B systems. You'll have a strong focus on usability and using metrics gathered through A/B testing to help continually improve the product.

This is a 100% remote role with regular online communications with the team, but you'll meet the team face-to-face at our regular team days or social events. This is an opportunity to work with an agile team to build software that can make a real difference to our clients and their customers.

The Essentials:

You will have:

- At least 3- to 5-years' experience in building lightweight user interfaces from provided design files
- Expertise in Vue.js Framework, or similar framework experience (React, Svelte, Angular)
- Expertise in JS (ES6+), TypeScript and CSS/SCSS
- A focus on performance and load times
- Working knowledge of integrating API endpoints into your projects
- Experience in writing unit tests with Jest of Vitest
- Working knowledge of accessibility and writing code to standards such as WCAG2.1
- Experience of responsive design and build
- A keen eye for detail
- Excellent verbal and written communication skills
- A portfolio of sites to which you have contributed or built

The Desirables:

Ideally, you'll have experience working with:

- Atlassian products (Jira, Bitbucket and Confluence)
- Git
- Agile teams
- Ionic Capacitor

The Company:

Feed It Back is a leading player in Online Reputation Management (ORM) and over the last few years has helped build reputations for some of the biggest and best hospitality brands in the UK, including TGI Fridays, Marco Pierre White restaurants, Loungers and GBK. Through our uniquely tailored ecosystem consisting of EPOS-linked surveys, complaint management, insights and reporting and much more, clients can ensure the best understanding and satisfaction at every stage of the customer journey.

Using our years of experience in reputation management, we're about to launch Yoodee, the next generation of online review platforms. Yoodee customers know best. On our app, customers decide if a business merits their recommendation. They can give the feedback privately, in as much detail as they want. And they can share the best experiences with their friends, family or followers. Customers' opinions really matter to cafes, pubs, shops, tradespeople and more. Feedback is constructive. Businesses really want to serve people better. On Yoodee, customers know best – and everyone benefits.
